# Cumulative

Need to find something published earlier this year in *Textile Chemist and Colorist*? This index can help you find it quickly either by author or by subject matter.

For example, if you know that the article you are looking for was written by Cunningham, the index of authors shows that Alan D. Cunningham is the author of Title 4. The index of titles, in turn, identifies Title 4 as The Controlled Coloration Approach for Right First Time Dyeing of Polyester, and shows that it was published in the January issue (1) beginning on page 23.

If you don't know who wrote the article, you can locate it by using the key term index. You know, for example, that the article reports on research on *dyeing* and deals with *controlled coloration*. Finding either of those terms in the key term index will give you the title numbers of all articles published this year pertaining to those terms.

Authorization to photocopy any article for internal or personal use beyond the fair use provisions of the Copyright Act is granted by AATCC to libraries and other users registered with the Copyright Clearance Center (CCC), provided that the fee of $3.00 per article copy is paid directly to CCC, 222 Rosewood Dr., Danvers, Mass. 01923, USA; telephone 508-750-8400; fax 508-750-4470. Copying for other than internal or personal use without express permission of AATCC is prohibited. The CCC Code for *Textile Chemist and Colorist* is 0040-490X.

The magazine is also available on microfilm from University Microfilms, Ann Arbor, Mich. 48106. In addition, the magazine is abstracted by *Chemical Abstracts, Engineering Index, Textile Technology Digest, Titus* (Institut Textil de France), and *World Textile Abstracts*.

A search engine is available on the AATCC web site. Access the site at http://www.aatcc.org then click on the *Articles* and *Index Search Engine* options.
